July 2025

Class: EY 3

English

This month, our young learners had a wonderful time exploring tricky words and practicing Jolly Phonics Group 4 to 7 sounds. They blended sounds to form 4-5 letter words and framed simple sentences using flashcards. Activities like "Read and Build a Sentence" made learning interactive. A special highlight was the poem "Bubbles", where children sang and blew bubbles, making word learning joyful. Matching tricky words while listening to the poem reinforced word recognition through play. These hands-on activities helped children strengthen reading, blending, and sentence-building skills in a fun way.

Mathematics

In July, our young learners explored exciting math concepts like Estimation, Number Names (0-10), subitizing up to 10, Days of the Week, Describing Length, Mass, Capacity, and Backward Counting (10 to 1). Activities like a Treasure Hunt, where children arranged numbers in backward order, and a Round Robin with digital games, clay modeling, and writing tasks made learning fun and hands-on. These engaging activities helped children visualize numbers, practice their skills, and understand math in a playful and meaningful way.

Understanding the World

In July, our young learners began an exciting unit on Farms and Being Outside. They went on a nature walk, observing and sorting living and non-living things using “I See, I Think, I Wonder.” Children explored seeds, noticing their size, colour, and shape. The children loved exploring planting activities—first watching seeds sprout in water, then moving them onto cotton, and finally planting them in soil to watch them grow. The highlight of their learning was a fun field trip to a farm, where they discovered which fruits and vegetables grow above the soil and which grow below.

This hands-on experience deepened their understanding of plant growth in a memorable and exciting way!

Primary Computing

In our computing lesson, learners began with a quick revision of computer systems, recalling the input and output devices, and hardware and software. They also learned how to properly switch off a computer system. After the recap, they moved on to understanding the structure of spreadsheets by learning what rows and columns are and how to identify and use rows and columns correctly. These foundational skills helped them better organize and manage information using digital tools.

Global Perspectives

This month, EY3 explored “All About Me and Others.” Through mirror play, self-portraits, and group games like “Who Am I?,” children learned how everyone is unique. Activities like “My Likes and Yours” encouraged comparison and appreciation of differences. Students began using sentence starters like “I like...” and “My friend likes...” to reflect on personal identity.

Musical Explorers: Rhythm, Culture & Connection!

In July, our young musicians joyfully explored the world of sound, rhythm, and culture. They were introduced to traditional Indian instruments like the sitar and tabla, enjoying their soothing melodies and lively beats. Through storytelling, music appreciation, and movement, children discovered how music can express emotions, tell stories, and reflect culture and identity. These experiences not only enhanced their listening and concentration skills but also encouraged creativity and self-expression. By engaging with different sounds and rhythms, children began to build a deeper connection with music, making their learning both meaningful and memorable in a playful, engaging environment.

Physical Education (PE)

In July, EY3 was buzzing with fun and learning through play and games! Children developed gross motor skills by running, jumping, and navigating obstacle courses, while their thinking skills grew through memory, matching, and sorting activities. Social skills flourished as they took turns, played in teams, and followed rules during team races and ball games. Building challenges with Lego and wooden blocks sparked creativity and problem-solving, helping children build confidence, focus, and collaboration—all while having a great time!

Visual Arts: EY III Artists

Mastering Design & Color!

Our EY III art class has been buzzing with creativity! We delved into the fascinating worlds of symmetrical and radial designs, creating balanced and beautiful patterns.

Little hands and fingers got wonderfully messy with hand and finger painting, exploring expressive art. Most excitingly, we embarked on a color theory adventure, transforming primary colors into vibrant secondary hues! It's incredible to see their understanding of art concepts blossom.

Dance

EY3's theme was "My Body Can Move." Learners discovered body parts and movement types through games like "Simon Says Dance," "Move and Freeze," and "Follow the Leader." Using ribbons and soft balls, they explored tempo and energy. Our favorite moment was the "Mirror Dance," where partners copied each other's creative moves, building social interaction and focus.

THEATRE: Imaginary Worlds & Role Play

In the month of July, our young performers stepped into imaginary worlds where anything was possible by taking on different roles—like astronauts, animals, pirates, and magical creatures—children created their fantasy scenes and stories through play. With the help of costumes, story prompts, and dramatic play zones, they built magical lands and acted out adventures using their voices, movements, and ideas. Activities like “Build-a-World” and “Character Parade” encouraged collaboration, storytelling, and confidence. It was a joyful journey of creativity where imagination was the key, and every child became the hero of their own story!
