July 2025

Class: EY 1

English

July was an exciting month for our Early Years learners as they dived into the world of English through Jolly Phonics, rhymes, and stories. They explored Group 1 and 2 letter sounds, practiced blending CVC words, and enjoyed sand writing, air writing, and sound games. Rhymes like Days of the Week and Old MacDonald added rhythm to learning. The story My Busy Body sparked curiosity about body parts, leading to lively discussions and creative art. A joyful journey of learning, listening, and laughter!

Mathematics

July was full of hands-on fun as our little learners explored numbers and shapes with great enthusiasm! They practiced counting from 1 to 10 through rhymes, games, and finger play, and counted real-life objects up to 5 to build a strong number sense.

Children joyfully traced numbers 2 and 3 using worksheets, sand trays, and air writing to develop fine motor skills. They also explored shapes, focusing on squares and rectangles through observation, comparison, and a fun classroom “Shape Hunt.”

A creative highlight was making rectangles with ice cream sticks!

Understanding the World

In July, our little explorers dived into the world of animals and families through fun, interactive learning. They learned the names and sounds of animals like cows, lions, and elephants using flashcards, rhymes, and videos. Children also explored types of animals—farm, wild, and pets—and began classifying them. We introduced the concept of life stages (infant, adult, and old) and basic family members such as mother, father, and grandparents. Through songs, stories, and discussions, children connected with the world around them in meaningful and joyful ways!

Discovering Music: A Magical Journey of Sound and Joy!

Our EY-1 learners have been joyfully exploring music through rhythm, rhyme, movement, and imagination. They listened to favorites like Wheels on the Bus, Five Little Ducks, and Hickory Dickory Dock, sparking curiosity and rhythm recognition. Hickory Dickory Dock was a highlight as children acted it out, learning sequencing and storytelling. Through beats, claps, and instrumental cues, they practiced listening, pattern recognition, and following directions—building strong auditory skills through joyful play.

Physical Education (PE)

Our little adventurers had a fantastic time moving, playing, and growing strong all through their exciting playground adventures! Activities like swinging, climbing, sliding, and crawling kept them moving and smiling, all while strengthening their big muscles. They pumped their legs on swings, climbed like little adventurers, and slid down with joy, boosting balance, coordination, and control. Crawling through tunnels added to the excitement and helped them plan their moves. These playful moments also supported their sense of balance and motion most joyfully!

Visual Arts: Our Collaborative Art Adventure!

What a month in EY I art class! We got wonderfully messy with finger painting, exploring textures, and colors. The highlight? Our collaborative hand-painting project! Each child contributed their handprint to create a magnificent, vibrant tree. It was amazing to see them work together, creating a beautiful piece that truly shows the power of teamwork and individual creativity. Our classroom tree is a testament to their budding artistic spirit!

Dance

In EY1, we introduced “Feel the Beat,” where children clapped, tapped, and moved with musical cues. Activities like “Marching Train,” “Stretch and Reach,” and “Freeze Dance” built their sense of rhythm and coordination. Movement stories encouraged imagination while helping them understand directions like up, down, and around.

We ended every session with a relaxing stretch to calm bodies and minds.

THEATRE: Imaginative Adventures

In the month of July, our EY1 learners dove into the magical world of role play, using their imagination to become doctors, shopkeepers, animals, superheroes, and more!

Through costumes, props, and dramatic corners, children explored different characters and everyday situations. These playful moments helped them develop language skills, empathy, and confidence as they acted out real-life roles with their peers. Activities like “Pretend Play Stations” and “Who Am I?” encouraged creative thinking, social interaction, and storytelling. It was a joyful and imaginative journey, where learning happened through make-believe, and every child had a starring role!
